NEHA KUMARI

Frontend & Full-Stack Web Development Intern | CSE @ NIT Patna

Patna, Bihar, India | +91 9229867745 | nehak.dd24.cs@nitp.ac.in | linkedin.com/in/neha-kumari-b23144326 | github.com/Neha863-tech | amazing-hertz-psi.vercel.app

EDUCATION

National Institute of Technology (NIT) Patna - Dual Degree (B.Tech + M.Tech) in Computer Science & Engineering 2024 - 2029 (Expected)

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems (DBMS), Operating Systems, Computer Networks, Web Technologies

TECHNICAL SKILLS

Frontend Development:	React.js (v18), Vite, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Responsive Web Design, DOM Manipulation
Backend & APIs:	Node.js, Express.js, FastAPI, RESTful APIs, Asynchronous Programming (AsyncIO, Motor), JWT Authentication
Databases & Storage:	MongoDB Atlas, PostgreSQL, SQLite, SQL
Programming Languages:	C++, Python, JavaScript, TypeScript, Java
Tools & Deployment:	Git, GitHub, VS Code, Postman, Docker, Vite, Vercel, Linux/Bash

WEB DEVELOPMENT EXPERIENCE

Incubation Centre, NIT Patna - Frontend Developer Contributor Patna, India | 2025 - Present

- Developed responsive, accessible web pages and reusable UI components with **React.js** and **Tailwind CSS** for the campus entrepreneurship and startup showcase portal.
- Implemented administrative image upload, client-side validation, preview rendering, and deletion workflows using **RESTful API** endpoints and multipart form data.
- Improved mobile rendering and viewport performance by refactoring CSS layout structures and applying lazy loading across heavy media assets.
- Refactored component state management and directory hierarchy, reducing duplicate code and accelerating feature delivery across sprint cycles.
- Collaborated with student engineering teams using **Git & GitHub** for pull requests, feature branching, and peer code reviews.

FEATURED WEB DEVELOPMENT PROJECTS

TransitOps — Intelligent Fleet & Logistics Management System | GitHub | Live Demo React 18, Vite, FastAPI, MongoDB Atlas, Motor, PyJWT, REST APIs

- Built an end-to-end fleet operations platform for **Odoo Hackathon 2026** featuring a 4-tier Role-Based Access Control (RBAC) architecture for Fleet Managers, Drivers, Safety Officers, and Financial Analysts.
- Architected responsive SPA dashboards with claymorphic UI styling, persistent dark/light theme state, dynamic vehicle status tracking (Available, On Trip, In Shop), and driver license alert notifications.
- Engineered trip lifecycle workflows with automated vehicle-capacity vs. cargo-weight business rule validation, real-time vehicle dispatch state updates, and fuel cost auto-calculations via async FastAPI endpoints.

StockSense — Multi-Warehouse Inventory Management Platform | Live Demo React.js, Next.js, TypeScript, Tailwind CSS, REST APIs

- Architected a multi-warehouse logistics application managing operational document lifecycles across receipts, deliveries, internal bay relocations, and physical inventory adjustment audits.
- Designed centralized state management in **TypeScript** enforcing transactional status checks to prevent inventory count race conditions during cross-bay transfers.
- Implemented multi-attribute catalog search, dynamic SKU filtering, category grouping, and automated low-stock indicator alerts for replenishment operations.

TraceNet — Stylometric Text Analysis & Author Attribution Web App | GitHub React.js, TypeScript, Python, FastAPI, Scikit-Learn

- Built an analytical forensic web app extracting lexical diversity, punctuation entropy, and syntactic n-grams to detect author personas across anonymous forum threads.
- Integrated asynchronous **FastAPI** endpoints with a **React.js** client to compute and render real-time pairwise author similarity distance matrices.
- Constructed interactive SVG relationship graphs mapping actor clusters and providing transparent feature contribution scoring breakdowns.

ACHIEVEMENTS & HACKATHONS

- **Smart India Hackathon (SIH) 2026:** Qualified and selected in the **Internal Hackathon Round** at NIT Patna, developing software solutions to solve real-world problem statements under time-constrained evaluation.
- **Algorithmic Problem Solving:** Solved **250+ LeetCode problems** covering Data Structures, Dynamic Programming, Trees, and Graph algorithms in C++ STL.
- **Hackathon Competitions:** Built **TransitOps** for **Odoo Hackathon 2026**, and active contributor to NIT Patna CSE peer technical development circles.
